

AVE ECOTECH PVT LTD

Turning Waste into Sustainable Infrastructure

Green Construction Materials

100% Recycled | Zero Cement | Zero Waste

ABOUT US

AVE EcoTech converts plastic and industrial waste into high-performance and environmentally responsible construction materials.

With waste plastic and discarded foundry silica dust, we ensure durable, lightweight products that pave the way for a circular economy.

Aligned with India's Smart City and Net Zero goals, our solutions are sustainable, cost-effective, and certification-ready.

Delivering scalable, sustainable infrastructure for a low-carbon future.

WHY US?

100% Recycled Materials

Water Absorption < 1%

Acid & Chemical Resistant

Lightweight ($\approx$ 40% lighter than concrete)

UV & Weather Resistant

Faster Installation

2 Years Warranty*

*T&C Apply

EcoTiles

Colours Available

Technical Specifications

Compressive Strength: - 15N/mm² (Test Report Available)

Size : 1 sq. ft. per tile

Weight: 2.5Kg (~40% lighter than cement pavers)

Thickness: 25mm

Anti-skid: Yes

Fire-Proof: Test Report Available

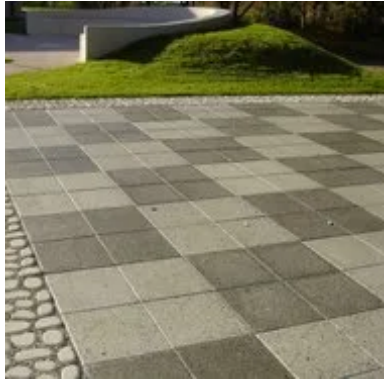

Concrete vs Ave EcoTech

Parameter	Cement Paver	EcoTiles
Strength	5-6 N/m2	15 N/m2
Wastage	≥10%	~0%
Weight	3-3.5 kg	2.5 kg
Installation time	High	Low (less weight)
Water Curing	Heavy requirement	Minimum
Water Absorption	5–8%	<1%
Acid Resistance	Poor	Excellent
Green Credits	N/A	Eligible
ESG reporting	Not Supported	Eligible (GRI, BRSR, CDP)

Applications & Use Cases

Footpath

Parks

Parking

Verandah
