

GREEN CONSTRUCTION MATERIALS

Turning Waste into Sustainable Infrastructure

100% RECYCLED | ZERO CEMENT | ZERO WASTE

A construction material made from waste streams.

AVE EcoTech converts waste plastic and discarded foundry silica dust into high-performance, environmentally responsible construction materials — durable products for a circular economy.

Aligned with India's Smart City and Net Zero goals: sustainable, cost-effective and certification-ready.

COLOURS

Anti-skid/Child Proof

Strong Grip with a Smooth Surface for Kid's play areas

Cost effective

Priced against conventional pavers

Lighter

2.5 kg — about 40% lighter

Acid resistant

Unaffected by acids and chemicals

Green Credits Eligible

IGBC, LEED, GRIHA, GEM eligible

Lower install cost

Fewer man-days, zero cutting waste

Algae Resistant

0% Algae formation, proven tests with NCL Pune.

Longer lifespan

No spalling, colour-fast in UV

A lighter, lower-waste alternative.

Faster Installation, easier handling for labour and better results.

PARAMETER	CEMENT	ECOTILES
Weight	3–3.5 kg	2.5 kg
Algae Resistance	Poor	Excellent
Water curing	Heavy requirement	Minimum water
Water absorption	5–8%	< 1%
Acid resistance	Poor	Excellent
Wastage	≥ 10%	~0%
Green credits	N/A	Eligible

Built for the Real World Weather. Chemicals. Traffic

Footpaths & streetscapes

Sidewalks - easy to apply

Parking & driveways

Society and commercial bays, oil and acid resistant.

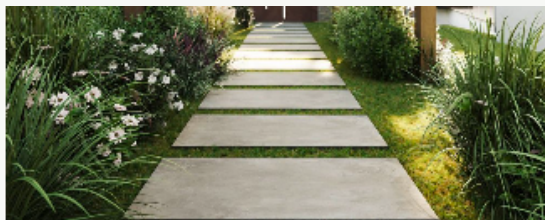

Industrial & chemical labs

Plant floors and lab areas where acids and spills attack cement.

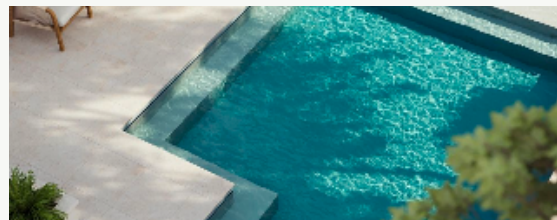

Terraces & podiums

40% lighter than concrete — a real saving on dead load.

Gardens & resorts

Landscape paths and stepping stones; UV resistant.

Pool decks

Wet surrounds and pool copings — under 1% absorption, no spalling.

Laid, walked on, signed off

During the development of Midori Towers, Mamurdi, Pune, we were looking for a tiling solution that would not only enhance the aesthetics of our poolside area but also provide durability, safety, and long-term performance. After selecting AVE EcoTech EcoTiles, the results exceeded our expectations.

PARAG KULKARNI
DIRECTOR AT P SQUARE REALTY

Despite being manufactured without cement, the tiles are remarkably robust, lightweight, and engineered to outperform conventional cement pavers in key performance areas.

RAHUL BAMB
MECHANICAL ENGINEER

TRUSTED BY

Turn waste into the next surface.

Tell us the area, the finish and the site — we will send tiles to handle, a rate for your quantity and the test reports your specification needs.
